# Wall mounting case AR400

**AR400** systems are particularly suitable for small areas or on large sites, where it is preferable to have a number of small self-contained monitoring systems connected by a field bus to a remote Host system.

AR400 systems consists of a full wired box unit for , up to 4 REL/isp modules and 12 ISP alarms outputs with (SPDT) relay and serial line RS-485.

**GENERAL SPECIFICATION**
12 (SPDT) 3A 110 Vac relays outputs, configurable even with isp technology
Standard serial line RS-485
Extensive libraries of ready-to-go configuration available.

**Electrical Specification**

| | |
|---|---|
| Supply voltage | 110-220 Vac |
| Supply fuse | 1 A |
| Stabilised power supply output | 13.75 |
| Overvoltage protection | ± 50V. |

**Environmental Specification**

| | |
|---|---|
| Storage temperature | -40 to80 °C |
| Operating temperature | -10 to 70 °C |
| Humidity range | 90% R.H. n.c. |

**Mechanical Specification**

| | |
|---|---|
| Overall dimensions | 320x240x280 mm |
| Mounting | 3U-49 TE Rack |
| Cabling | Screw terminals |
